**1. Employee Record Management using File Handling**

Develop a Java application to manage employee records using file handling. The application should accept Employee ID, Employee Name, Department, and Salary. Use appropriate character streams to store employee details in a text file and provide options to add, display, and search employee records. Implement suitable exception handling for file operations and display appropriate messages when the file or record is not available.

Test Case | Input / Activity | Expected Output |

|-----|-----|-----|  
| TC1 | Add Employee ID = E101 , Name = Arun , Department = IT , Salary = 35000 | Employee record added successfully |  
| TC2 | Add Employee ID = E102 , Name = Priya , Department = HR , Salary = 42000 | Employee record added successfully |  
| TC3 | Select \*\*Display\*\* option after adding E101 and E102 | Details of all stored employee records are displayed |

2. Bank Account Transaction Management using JDBC

Develop a Java JDBC application to manage bank account transactions. Create a database table containing Account Number, Account Holder Name, and Balance. Implement operations to create an account, deposit money, withdraw money, and display account details. Validate the withdrawal amount so that it cannot exceed the available balance. Use an appropriate JDBC statement and handle database exceptions.

| TC | Input / Activity | Expected Output |

| ----- | ----- | ----- |

| \*\*TC1\*\* | Account=1001, Name=Arun, Balance=10000; Deposit=2000 | Balance = 12000 |

| \*\*TC2\*\* | Account=1001; Withdraw=3000 | Balance = 9000 |

| \*\*TC3\*\* | Account=1001; Withdraw=15000 | \*\*Insufficient Balance\*\* |
